Cutting food supply is primary target of bird flu

Tue 9:28 pm +01:00, 11 Jun 2024 3

posted by Tapestry

They tried this with the Marburg virus. They tried it with Ebola. They tried it with Monkey Pox. Now, they are trying it with Bird Flu. . . . Back in 2005, I actually wrote a book called 'Foul Bird Flu: It's Not What You Think.' I am going to be updating it and re-releasing it in a couple of weeks. It was an historical book, and I was writing it in real time back in 2005. What they are doing now is the same thing except the difference is they are coming after our food supply.

They are going to be culling millions of chickens. If one cow on an entire ranch tests positive for H5N1, they are talking about killing off the entire ranch. Instead of isolating that particular cow and seeing if they can get sick, no, they are just going to kill them all. So, they are in the process of decimating our food supply. I think this is a really important fact for people to know about and get prepared."

Dr. Tenpenny goes on to point out, "They can release it under an EUA (Emergency Use Authorization), and I believe the FDA has found a loophole in the law to where they can release anything coming in the future as an Emergency Use Authorization. So, they are not liable. You can't sue them. They don't have to put up a package insert. There were three rules that they violated when they released the Covid shot, and they are just out to get us all vaccinated. They just want to get every single person with as much foreign matter into our bodies as they possibly can."

There are about 700 million CV19 vax injections that have been given in the US alone. Dr. Tenpenny says these injections cause a variety of problems such as sudden death, dramatically reduced immune system, heart problems, blood clots, autoimmune disease and unusually fast spreading cancers called "Turbo Cancer." Dr. Tenpenny says, "Even if you have had just one Covid shot, you have increased your risk of sudden death and developing cancer.

The more shots you have, the more your risk is. . . . 'Turbo Cancer' is a brand-new terminology in medicine. I have been a doctor for a long time, and that is a brand-new word they developed after the Covid shots. These people may have been in complete remission, and their cancers came back in a highly aggressive way, or they got new cancers that from the time they were diagnosed until the time they died were months, weeks or sometime even days. So, they didn't even have time to start getting . . . current known cancer treatments."

In closing, Dr. Tenpenny advises NOT to get the Bird Flu shot and no more CV19 boosters.

There is much more in the 59-minute interview.

Join Greg Hunter of USAWatchdog.com as he goes One-on-One with Dr. Sherri Tenpenny, one of the first medical doctors to tell everyone NOT to take CV19 bioweapon injection. Dr. Tenpenny is now warning NOT to take the Bird Flu vax for 6.5.24.

It won't be long before they are doing it here Tap. Here down in Sussex earlier in the year some councils sent out circulars requesting information on whether birds were kept on your property – no doubt they are intending to go after old ladies pet budgies!

Yes newensign I agree

In fact, is it already happening here? Is the current cold, dark, climate part of the same thing?

Early in the century the Pentagon said that they intended to “weaponize the weather by 2025” didn't they. I've seen enough to think that they have already achieved this

So, is this last 9 months horrible weather really “man made climate change”? Nothing to do with CO2 of course, but some other methods that work? Very possible...

We are under full spectrum assault now. Silent weapons for silent wars. It's hard to find positives but there are some. At least we are not rabbits in the headlights like so many others are. We can see the train coming, and so we have a chance of dodging out of the way when it arrives

The Boy Scouts motto is “Be Prepared” very sound advice

Yes Pete, I believe you are right about the weather. By dimming the sun, that too is affecting our health and quality of food. Most people are clueless as to what is really going on or don't want to know. By knowing what we do, although its difficult to source wholesome food these days, bad stuff we inadvertently ingest or breathe in the body can cope with it, but those eating junk food and drinking tap water the body gets overloaded. Its very time consuming trying to source good food and avoiding all their traps!!
